- 

## Projects

### Notable StuntCoders proprietary projects:

- **Skintific:** A Ruby on Rails-based appointment scheduling application tailored for skin care clinics.
- **ExtraBites:** A platform targeting the HoReCa sector, offering restaurant reviews, digital menu display via QR code scanning, and a dashboard for order management with a kanban-style orders interface.
- **LivingAutism:** A Ruby on Rails-driven web platform, integrating WordPress for content management, offering comprehensive support and information for autism-related services in the UK.
- **privatni-casovi.net:** A Ruby on Rails platform for students and private tutors, facilitating connections and interactions in various educational fields.
- **BlahFace:** A social media platform leveraging Ruby on Rails, with WordPress/Elementor for admin content management.
- **Custom-tailored RoR applications:** Various projects integrating Vipps, Vonage, Twilio, WebRTC video streaming.
- **Various eCommerce shops:** Development and maintenance of various Magento 1 and WordPress/WooCommerce shops, B2B integrations with Microsoft Navision and Tradebyte, feature development for Magento 1 vendor and various other shops.
- **Infrastructure Management:** Handling applications on Digital Ocean and fly.io.

*Due to confidentiality, in-depth details of these projects cannot be shared.:* Handling applications on Digital Ocean and fly.io.

---

### Notable personal projects:

- **Finance Management App (Ruby on Rails):** A personal tool for managing finances, categorized by accounts, incomes and expenses. Intended for personal use with a potential to go open-source in the future.
- **Gym Trainer Management System (Ruby on Rails):** A comprehensive platform catering to trainers and clients. Super-trainers create video content for exercises, trainers curate personalized workout regimes for clients, and clients get customized programs to follow.
